## A YEAR FOR THE CARRY

THE ASSET CLASS BENEFITS FROM ITS RECORD-HIGH CARRY, WHILE CREDIT PREMIUMS HAVE FALLEN SLIGHTLY YEAR-TO-DATE, AND RATES ARE AT END-2022 LEVELS

	June	Year To Date	Yield To Worst (%)
HEAE INDEX	0.67%	4.77%	7.56
BB	0.66%	4.36%	6.24
B	0.81%	6.09%	8.25
CCC	0.94%	2.11%	16.13
Hybrid	0.55%	3.42%	6.79
Xover	1.75%	6.44%	4.00
HOAO	1.63%	5.41%	8.63

Corporate margins at a record high in Europe

Source : JPM, June 13, 2023

Bond coupons have reached 4.1% from a cycle low of 3.75%

# A MODERATE RISE IN DEFAULT RATES EXPECTED

GIVEN LOW REFINANCING NEEDS, RESTRICTIVE MONETARY POLICY HAVE A LIMITED EFFECT IN THE SHORT TERM. COUPLED WITH SOLID CREDIT PROFILES, THIS SHOULD MODERATE THE RISE IN THE DEFAULT RATE IN THE SHORT TERM

Source : SG, May 20, 2023

**Despite tightening credit conditions, default rates should remain moderate**

Exhibit 12

European speculative-grade default rates (actual and forecast)

Source : Moody's, June 15, 2023

**Moody's expect the 12-m default rate to remain below 4%**

## FOCUS ON REAL ESTATE

REAL ESTATE COMPANIES REMAIN IN DIFFICULTY, BUT THE PROBLEMS SEEM TO BE CONFINED TO A FEW ISSUERS (SBB, SIGNA, DEMIRE, CITYCON HYBRID, HEIMSTADEN HYBRID) WITH LIMITED RISK OF SPREADING TO THE REST OF THE HIGH YIELD SECTOR

		EURO HIGH YIELD (€bn)			
Sector	% of €HY	Face Value	Distressed	Distressed Ratio	Share of Distressed Debt
Real Estate	5.0%	21.0	10.4	49.7%	57.2%

## KEY MESSAGES

---

- The market posted an excellent performance year-to-date, linked to the carry of the asset class. The slow normalization of inflation is keeping spreads and rates at high levels.
- Corporate earnings are of good quality, and their credit profile is relatively defensive, to guard against a possible acceleration of the slowdown, now postponed to 2024.
- Against this economic backdrop, our message remains constructive on the asset class, particularly via BBs. However, discernment between issuers remains key.
- At around 7.5% yield at worst, carry remains very attractive on the asset class, despite the gradual rise in default rates on the most fragile issuers.
- We do not rule out new periods of stress on credit spreads at H2 2023, given inflation levels and the lack of visibility on the extent and duration of the economy's entry into recession.

## A RESPONSIBLE APPROACH WITH HIGH SELECTIVITY

(1) Speculative High Yield bonds have lower credit ratings (from BB+ to D according to Standard & Poor's and Fitch, and from C to Ba1 according to Moody's) than Investment Grade bonds (which are rated from AAA to BBB- according to Standard & Poor's and Fitch, and from Baa3 to Aaa according to Moody's) as their issuers are in poorer financial health according to research by the rating agencies. They are therefore regarded as riskier by the rating agencies and, accordingly, offer higher yields.

(2) The fund may also invest in the same way in forward financial instruments such as credit derivatives (CDS, CDS indices), and up to 10% of its assets in shares of private companies in OECD countries.

SFDR category <sup>(2)</sup>	Article 8
External financial management and administrative fees incl. tax	GI units: 1,10% maximum / GR units: 1,80% maximum
Maximum transaction fee <sup>(3)</sup>	From €0 to €450 excl. tax
Maximum front-end fee incl. tax	2%

### RISK PROFILE<sup>(1)</sup>

Lower risk

Higher risk

<sup>(1)</sup> The risk indicator is based on the assumption that you will hold the product for the full recommended holding period. Actual risk may differ if you opt to withdraw before the end of the recommended holding period, and you may obtain less in return. The synthetic risk indicator assesses the product's risk level in relation to other products. It is an indication of the likelihood that this product will incur losses in the event of market movements or if we are unable to pay out.

This product does not offer protection against market fluctuations, so you may lose some or all of your investment.

<sup>(2)</sup> REGULATION (EU) 2019/2088 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 November 2019 on sustainability-related disclosures in the financial services sector

<sup>(3)</sup> Refer to the fund's prospectus for more details. These fees are collected by the depository/custodian.

## MAIN RISKS

### CAPITAL RISK AND PERFORMANCE RISK

The investor is advised that the performance of the UCITS might not conform to their objectives and that their capital might not be returned in full, the UCITS not benefiting from any guarantee or protection of capital invested.

### INTEREST RATE RISK

Because of its composition, the UCITS may be subject to an interest rate risk. This risk results from the fact that, in general, the price of debt securities and bonds falls when rates rise. The investor in bonds or other fixed-income securities may record negative performances as a result of fluctuations in interest rates.

### CREDIT RISK

In the case of downgrading of private issuers (for example, of their rating by financial rating agencies), or of public issuers, or their defaulting, the value of private bonds may fall. The net asset value of the UCITS would then be affected by this drop.

### HIGH YIELD RISK

This is the credit risk applied to what are known as "speculative" securities which present probabilities of default higher than those of Investment Grade securities. In return, they offer higher levels of return, but can, in the case of downgrading of the rating, significantly reduce the net asset value of the UCITS. The unrated signatures which are selected will, for the most part, come under this category in the same way and may present equivalent or greater risks because of their unrated nature.

### COUNTERPARTY RISK

This is the risk associated with use by the UCITS of futures, OTC instruments and/or resorting to acquisitions and temporary purchase and sale of securities. These transactions concluded with one or more eligible counterparties potentially expose the UCITS to a risk of defaulting of one of these counterparties possibly resulting in failure to pay which will reduce the net asset value.

### EMERGING MARKETS RISK

The conditions of functioning and supervision of the emerging markets may deviate from standards prevailing on major international markets: information about certain securities may be incomplete and their liquidity more reduced. Evolution in the price of these securities may therefore vary markedly and significantly impact the net asset value.

### SUSTAINABILITY RISK

Sustainability risks are primarily related to climate events resulting from climate change (known as physical risks), the ability of companies to respond to climate change (known as transition risks) and which may result in unanticipated losses affecting the mutual fund's investments and financial performance. Social events (inequalities, labour relations, investment in human capital, accident prevention, changes in consumer behaviour, etc.) or governance gaps (recurrent and significant breach of international agreements, corruption, product quality and safety and sales practices) can also translate into sustainability risks.

Consequently, the investor may be exposed to the following risk:

### EQUITY RISK

If the shares to which the portfolio is exposed fall, the net asset value of the fund may fall. The UCITS may also be exposed to convertible bonds; these may display a residual share sensitivity and experience marked fluctuations linked to changes in the prices of the underlying shares. The investor's attention is drawn to the fact that the net asset value of the UCITS will drop in the case of an unfavourable change.

For more information on the management company's sustainability risk integration policies and details of ancillary risks, investors are invited to visit [www.ofi-invest-am.com](http://www.ofi-invest-am.com).
